Evan (Front End Developer)

Jakarta, Indonesia | 08152229232 | evan.epifanius@gmail.com

SUMMARY

Evan is a fresh graduate of the Informatics department at Multimedia Nusantara University. He possesses exceptional initiative, excelling both as an independent worker and a valuable team member. With a strong aptitude for analysis, troubleshooting, and creative problem-solving, Evan consistently upholds high-quality standards. He thrives in dynamic, fast-paced environments, effortlessly managing multiple projects simultaneously.

WORK EXPERIENCE

PT Hashmicro Solusi Indonesia   **West Jakarta, Hybrid**
Frontend Developer Intern   Feb 2022 - Jun 2022
- Developed a user-friendly career website enabling seamless job applications using HTML, CSS, JavaScript, jQuery, Bootstrap, and GSAP.
- Enhanced the user interface of the company website by optimizing its responsiveness with CSS.
- Ensured timely content updates on the company website and effectively managed website files.
- Successfully managed and maintained four key company websites.

PT Indonesia Indicator   **East Jakarta, Hybrid**
Frontend Developer Intern   Aug 2022 - Dec 2022
- Collaborated on an Angular project, translated design mockups from Figma into HTML, and implemented functions to retrieve data from APIs. Developed a time filter feature and utilized mapping techniques. Addressed and resolved various bugs.
- Designed and developed a versatile website capable of managing workspaces. Configured workspace-specific menus, created functionality to manage roles and users, and implemented role-based access control for menus using React.js.
- Expertly sliced multiple designs from Figma to HTML, utilizing HTML, SCSS, and Gulp for efficient development and styling.

Frontend Developer Freelance   Jan 2022 - Jun 2022
- Successfully completed the workspace management intern project, effectively managing and delivering the web-based solution.
- Engaged in a React JS project to develop a comprehensive website for managing company assets, including personal data, pictures, and more. Translated designs into code and implemented essential services such as POST, GET, DELETE, and PUT for seamless data management.
- Played a key role in the development of various website features, including integrating API services and implementing efficient filtering functions, among other contributions.

EDUCATION

Multimedia Nusantara University, Kab. Tangerang   Jul 2019 - Present
Bachelor's Degree in Informatics, GPA: 3.84 / 4.00 (128 Credits)
- Multimedia Nusantara 60% Entrance Tuition Fee Scholarship Awardee (2019).

- Received Academic Scholarship for 2021/2022 School Year / Even Semester.
- Instructor of PowerPoint Learning for "Prajurit and PNS KOREM 2021".
- Vice Event Coordinator for Informatics Study Program Introduction 2021.

PROJECT

Collage Project (6 Projects)   2020 - 2021

Created a website using PHP, CodeIgniter (CI), React Ionic, and created a mobile application using Java

- Integrated the Weather API to retrieve real-time weather data, enhancing the functionality of the application.
- Developed a robust MySQL database to store and manage data efficiently.
- Designed and implemented a user-friendly interface, coupled with an efficient algorithm, to seamlessly interact with the database and retrieve data.
- Implemented Firebase functionality to facilitate the seamless retrieval and posting of data through the creation of custom GET and POST functions.

Job Portal   Mar 2022 - May 2022

A job board website-based project at PT Hashmicro Solusi Indonesia, Link

- Developed a professional job board website utilizing HTML, CSS, Bootstrap 5, native JavaScript, and GSAP.
- Collaborated closely with the UI/UX Designer Team to ensure seamless implementation of the sliced UI design.
- Incorporated engaging animations into the website using the GSAP animation library, enhancing the user experience.
